GINKONet Project

(Greater Indiana, Kentucky, and Ohio Network)

What is GINKONet

- A proposed PLN for the greater Indiana, Kentucky, and Ohio region created by former MetaArchive members
- The GINKONet Project was started in April 2024 when MetaArchive announced that it would be sunsetting
- September 2024 applied to a IMLS Grant
- November 2024 created biweekly working meetings
- February 2025 coordinated with LOCKSS to begin the process of transforming the Dandelion Archive into GinkoNet
- April 2025 applied to Gladys Brooke Foundation Grant

CASE WESTERN RESERVE UNIVERSITY

INDIANA DIGITAL PRESERVATION

PURDUE UNIVERSITY

LOCKSS Program

Project Goals

1. Create a sustainable, reliable, community-led, low-cost digital preservation network

1. Create a regional digital preservation community

1. Resolve some of the major issues that caused MetaArchive to fall apart
    a. Universal Ingest plugin
    b. Streamline governance
    c. Reduce overhead cost

Costs

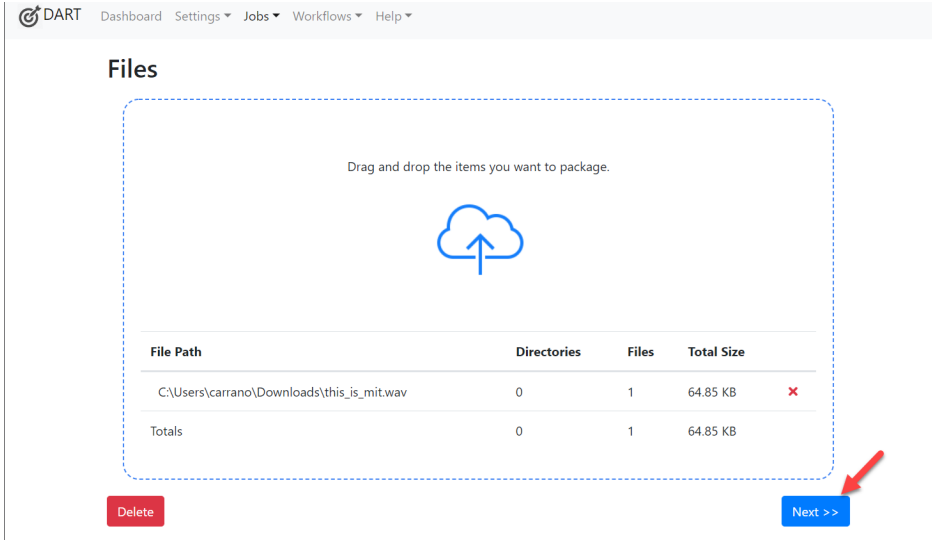
- Cost are going to be similar to MetaArchive
  - No Educopia fees
  - Eliminate overhead cost

- Start up Cost
  - Equipment
  - Technical Setup
  - Governance Setup

SAFE PLN
SAFE Archive FEderation

Project Timeline

- **2025** - Set up LOCKSS 2.0 network with existing MetaArchive equipment
- **2025 -** Apply for additional grant funding
- **TBD** - ingest content into network with DART or other user friendly ingest tool
- **TBD -** Finalize governance documentation



Current Challenges

- This project will take time to implement.
- The success of GINKONet is based on the time and sweat equity people dedicate to the project.
- It recommended that a LOCKSS network has 5 nodes.
  - Purdue, Louisville, Case Western - self host
  - InDiPres - node hosted by IU
  - Paid node - hosted by LOCKSS Program
